

Special Lecture on Web Application Development

By
Ashok Kumar.S
Assistant Professor/CSE
Manakula Vinayagar Institute of Technology

Software's Needed to Build Website

- ▶ XAMPP and WordPress

X- Cross Platform (Windows, Linux and Mac)

A- Apache

M- MySql

P- PHP

P- Perl

To Download XAMPP:

- ▶ <https://www.apachefriends.org/index.html>

To Download WordPress:

- ▶ <https://wordpress.org/download/>

Install Xampp and Create Database

- ▶ Install Xampp
- ▶ Start Apache and Mysql in Xampp control panel

To Create Database:

- ▶ <http://localhost/phpmyadmin>
- ▶ Databases → Create Database → Create

To Install WordPress:

- ▶ Inside Xampp → htdocs → Paste downloaded word press file (Rename if you want).

How to work on WordPress

Type the below url in browser

- ▶ <http://localhost/wordpress>

Details needed:

- ▶ Database Name
- ▶ Username
- ▶ Password
- ▶ Host Name
- ▶ Prefix

Enter all the above details →ok→ Run to install

How to work on WordPress

- ▶ Provide Sitename and Username → Ok (Password is Auto Generated)
 - .
- ▶ Copy the auto Generated Password to login.

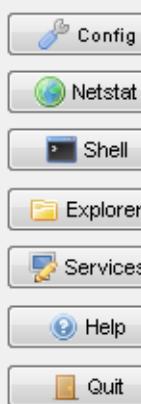

Login To create Website:

- ▶ <http://localhost/wordpress/wp-admin>
- ▶ Login with username and password.

Modules

XAMPP Control Panel v3.2.2

Service	Module	PID(s)	Port(s)	Actions			
<input type="checkbox"/>	Apache	5024 5080	80, 443	Stop	Admin	Config	Logs
<input type="checkbox"/>	MySQL	5104	3306	Stop	Admin	Config	Logs
<input type="checkbox"/>	FileZilla			Start	Admin	Config	Logs
<input type="checkbox"/>	Mercury			Start	Admin	Config	Logs
<input type="checkbox"/>	Tomcat			Start	Admin	Config	Logs

12:17 AM
2/7/2017

Welcome to WordPress. Before getting started, we need some information on the database. You will need to know the following items before proceeding.

1. Database name
2. Database username
3. Database password
4. Database host
5. Table prefix (if you want to run more than one WordPress in a single database)

We're going to use this information to create a wp-config.php file. **If for any reason this automatic file creation doesn't work, don't worry. All this does is fill in the database information to a configuration file. You may also simply open wp-config-sample.php in a text editor, fill in your information, and save it as wp-config.php.** Need more help? [We got it.](#)

In all likelihood, these items were supplied to you by your Web Host. If you don't have this information, then you will need to contact them before you can continue. If you're all ready...

Let's go!

Below you should enter your database connection details. If you're not sure about these, contact your host.

Database Name

The name of the database you want to use with WordPress.

Username

Your database username.

Password

Your database password.

Database Host

You should be able to get this info from your web host, if localhost doesn't work.

Table Prefix

If you want to run multiple WordPress installations in a single database, change this.

All right, sparky! You've made it through this part of the installation. WordPress can now communicate with your database. If you are ready, time now to...

[Run the install](#)

Welcome

Welcome to the famous five-minute WordPress installation process! Just fill in the information below and you'll be on your way to using the most extendable and powerful personal publishing platform in the world.

Information needed

Please provide the following information. Don't worry, you can always change these settings later.

Site Title

Special lecture on web applicati

Twenty Fifteen

The Myth of the Pier

Joined after the fall of the Vikings, they have won their island's splendid parrot trophy for the especially distinguished team every year since 1967. They were beaten in last year, and last year they made it three. These guys are a solid outfit, and we're looking forward to seeing them again next year.

ABOUT

CAPABILITIES

Add New Theme

This screenshot shows the 'Themes' section of the WordPress admin dashboard. The left sidebar lists various site management options like Dashboard, Posts, Media, Pages, etc. The main area displays five themes: 'ColorMag' (active), 'Giga Store', 'Twenty Fifteen', 'Twenty Sixteen', and 'Twenty Seventeen'. Each theme is represented by a preview image and a title. The 'ColorMag' preview shows a news-like layout with a dark header and a grid of images. 'Giga Store' is a WooCommerce theme featuring a man in a suit. 'Twenty Fifteen' has a sunset over a pier. 'Twenty Sixteen' shows a sunset over water. 'Twenty Seventeen' shows a potted plant on a wooden surface. A large '+' icon in a circle is at the bottom right, and a link 'Add New Theme' is at the bottom center.

This special lecture is aimed to impart basic knowledge in the creation of our own website.

As a Computer Science and Engineer it is mandatory and will be good if we have our own website through which we can share the files with our colleagues friends. Wordpress is a simple tool which has in-build files which link our website to the database which we create.

It is a tool which is also used in most of the small scale companies.

This screenshot shows the WordPress 'Add New Page' interface. The left sidebar includes links for Dashboard, Posts, Media, Pages (selected), All Pages, Add New, Comments, Contact, Appearance, Plugins, Users, Tools, Settings, and Collapse menu. The main content area has a title 'Computer Programming notes' and a permalink. It features a rich text editor toolbar with buttons for bold, italic, link, and various list types. A 'Page Attributes' sidebar on the right shows the page is set to 'Lecture notes' under 'Parent' and 'Default Template' under 'Template'. The status is listed as 'Draft' with a 'Publish' button. The bottom navigation bar shows other open tabs like 'driving (4).doc' through 'driving (1).doc'.

To create contact form

GOTO

- ▶ Plugins → Add New → Contact Form 7 → Install → Activate.
- ▶ On Left Side We Can see a menu named “Contact” → Add New → Publish
- ▶ Copy the short code and Paste in “Contact us” Page which is already created.

← → C i localhost/wordpress/wp-admin/post-new.php?post_type=page

Help

Getting spammed? You have protection.

Spammers target everything; your contact forms aren't an exception. Before you get spammed, protect your contact forms with the powerful anti-spam features Contact Form 7 provides.

Contact Form 7 supports spam-filtering with [Akismet](#). Intelligent [reCAPTCHA](#) blocks annoying spambots. Plus, using [comment blacklist](#), you can block messages containing specified keywords or those sent from specified IP addresses.

Before you cry over spilt mail...

Contact Form 7 doesn't store submitted messages anywhere. Therefore, you may lose important messages forever if your mail server has issues or you make a mistake in mail configuration.

Install a message storage plugin before this happens to you. [Flamingo](#) saves all messages through contact forms into the database. Flamingo is a free WordPress plugin created by the same author as Contact Form 7.
